PLAN OBJECTIVE

The World Surf League (“**WSL**”) believes that the health, safety and well-being of our athletes, employees, stakeholders and the communities within which we work and travel to, remains our highest priority, and the objective of this Plan is to provide a prudent, safe and responsible working environment for events in compliance with all applicable laws, regulations and guidelines that have been implemented to combat COVID-19.

This document sets forth a detailed, comprehensive COVID Safety plan (the “**Plan**”) for the upcoming WSL event scheduled to take place on January 29 to February 10 at Banzai Pipeline (the “**Event Site**”) in the **Billabong Pro Pipeline** (the “**Name of Event**”). Attached to this plan as Appendix B are maps of the Event Site, which provide illustrative depictions of the Event, including the staging of event staff and athletes (the “**Event Maps**”).

We sincerely appreciate the opportunity to present this Plan to you and welcome any questions and feedback.

PLAN OVERVIEW & SUMMARY

Pursuant to this Plan, WSL is modifying its standard operating procedures to minimize to the greatest extent practicable any COVID-19 concerns relating to WSL Events.

This Plan will be communicated to all WSL personnel, athletes and the event site crews, in advance of WSL events. All WSL personnel and the event site crews will be briefed on this Plan by an appropriate member of the WSL executive or event operations team and will have the opportunity to ask any questions or request any further details or information. If anyone does not comply with this Plan, they will not be permitted to enter or remain on premises at WSL events (or related provided hotel accommodations where applicable).

A. Health and Safety Procedures

This section of this Plan outlines the health and safety procedures that WSL will implement for WSL events. The health and safety procedures were developed through consultation with public health officials, medical experts, local and state officials, WSL's medical specialist, Dr Allan McKillop, WSL Director of Global Health & Safety, Bern Page, in collaboration with the WSL General Counsel, Bob Kane, and the WSL Leadership Team. In addition, these procedures have been informed by guidelines set by the Centers for Disease Control (CDC) and Prevention, World Health Organization (WHO), and emerging best practices established by other sports leagues and broadcast-only live sports events.

B. Event Operations

This section of this Plan outlines the operational procedures that WSL will implement for the WSL Event. We have developed an operational plan that would permit us to stage and produce the WSL Event with the minimum number of WSL personnel and athlete team personnel required. WSL personnel who would typically be on-site for a standard WSL event but who are not critical to event operations will be prohibited from attending the WSL Event and instead will be instructed to complete their event-related tasks from their homes. Site Maps provide illustrative depictions of the event site.

We note that certain third party vendors of WSL, may be implementing their own independent health and safety protocols in coordination with WSL and its plans for the WSL event. Upon request, WSL will ask the third party vendors to provide a copy of their health and safety protocols. Notwithstanding any independent protocols, to the extent that such vendors fall within the purview of this Plan based on their operational functions, such vendors will be subject to this Plan.

C. Key Safety Protocols

- Minimal personnel at the event site.
- COVID-19 testing prior to arrival in the US and Hawaii.
- Vaccinated and non-vaccinated event attendees must present a negative COVID-19 test result (PCR -72hrs, or Antigen -48hrs) to check in to the event, or recovery documentation, or return a negative Antigen test result to check in to the event.
- Masks and physical distancing are strictly enforced.

HEALTH & SAFETY PROCEDURES

A. Travelling to the US and Hawaii

To reduce the risk of transmission of COVID-19 in the United States / Hawaii and avoid the strain on the United State's / Hawaii's healthcare system, all athletes, athlete team personnel and staff travelling to the United States / Hawaii will comply with the following:

- Travel to the United States. All air passengers (2 years of age or older) travelling to the US from a foreign country, must present (1) a negative PCR or Antigen test result for a test done no more than 1 day before their departure flight to the US OR (2) documentation certifying recovery from COVID-19, when boarding their flight to the US. Non US Citizens must additionally provide proof of full vaccination. If you do not provide the required documentation, you will not be allowed to board your flight to the US.
- Travel to Hawaii.
 - *Safe Travels Hawai'i Registration*. Prior to your departure for Hawaii, if you are an adult (age 18 years or older) you will need to create an online user account and register with the State of Hawaii Safe Travels Hawaii program. If you have previously registered, you may use your existing account. Once you create your Safe Travels Hawai'i account, you will next need to enter your traveler information and trip details on the program's application form. Visit Safe Travels Hawai'i Help for answers to questions about the online application form. *If you need assistance with login or technical issues, call the Safe Travels Program: 1-800-GOHAWAII or (1-800-464-2924) 10 a.m. to 10 p.m. Hawaii Standard Time.*
 - *Pre-Travel Testing*. All travelers wishing to bypass quarantine and who choose not to participate in the vaccination exemption program will be required to take a Nucleic Acid Amplification Test (NAAT) from a certified Clinical Laboratory Improvement Amendment (CLIA) lab in order to bypass the State of Hawaii's 10-day mandatory quarantine. For domestic arrivals, the State of Hawaii will accept test results ONLY from TRUSTED TESTING AND TRAVEL PARTNERS or the State's Digital Health Pass Partners — AZOVA, CLEAR and CommonPass. The test will need to be taken no more than 72 hours before your flight departure time. If you have a multi-city flight itinerary, the departure time is from the last city you leave before arriving at a Hawaii airport (e.g. if your travel is from Chicago to Seattle to Honolulu, the departure time to look at is your flight from Seattle). Once you receive your negative pre-travel test result, you will need to upload the result to your Safe Travels Hawai'i account. This step is crucial, as it will be the only means for airport officials to verify your Safe Travel Hawaii information upon your arrival in Hawaii
 - *Vaccination Exemption*. Travelers entering Hawaii from the U.S. and its Territories who have been fully vaccinated in the U.S. (including its Territories) may bypass quarantine without a pre-travel test. **The vaccination record document must be uploaded to Safe Travels and printed out prior to departure and the traveler must have a hard copy in hand when arriving in Hawaii.** The State of Hawaii will also accept vaccine records that

are digitally validated by Digital Health Pass Partners ([AZOVA](#), [CLEAR](#) and [CommonPass](#)). Travelers who use one of the State's partners to link their digitally validated vaccine records with Safe Travels may enjoy expedited processing at the airport (no secondary visual inspection of paper vaccine records).

- *Health Questionnaire.* Once you have created your account and entered your trip information, you will need to complete the mandatory health questionnaire – it will be available in your account 24 hours prior to departure. Upon completing the form, a QR code will be emailed to you. Prior to boarding or when you deplane in Hawai'i, you will be asked to present your QR code and your negative test result to airport personnel either on paper or on your mobile phone, along with a legally valid photo ID.
- *Trusted Testing and Travel Partners.* The State of Hawaii will ONLY accept Nucleic Acid Amplification Test (NAAT) from a certified Clinical Laboratory Improvement Amendment (CLIA) lab test results from trusted testing and travel partners. These are listed by region: [US Domestic](#), [Airlines & Airports](#), [Canada](#), [Japan](#), [Korea](#), [Taiwan](#), [Philippines](#) and [French Polynesia](#) at HawaiiCOVID19.com/travel-partners.
- *Temperature Checks.* All incoming travelers will receive temperature checks upon arrival. Temperature scans will be taken via thermal temperature screening. All incoming trans-Pacific Hawai'i travelers arriving with a temperature of 100.4 degrees F or higher, displaying COVID-19 symptoms, and/or providing answers on the Mandatory State of Hawaii Travel and Health Form requiring additional testing will be required to complete a secondary screening at the airport.
- *Quarantine Guidelines.* If you arrive in Hawaii **without valid proof of a negative COVID-19 NAAT or United States (including its Territories) vaccination**, you will be subject to the State of Hawaii's strict 10-day mandatory self-quarantine requirement.
- *Inter-County Travel Restrictions.* There are no longer any restrictions or requirements for inter-county travel.

B. Transportation

Transportation solutions such as airlines and car rental agencies selected by WSL for WSL personnel (and athletes and their team personnel if applicable), are prioritised for their demonstration of safest operating practices and being recognised for meeting current local COVID-19 related safety standards.

Personal protective equipment is required to be used by local transportation vendors as applicable by local and state guidelines.

WSL personnel, athletes and athlete teams (where applicable), will be assigned to transportation vehicles in advance, in order to limit interaction among different groups.

Vehicle pooling between airports, hotels and the event site, will be between the same shelter-in-place groups. Or, if transportation circumstances are challenged, the following will apply if necessary to travel in mixed shelter-in-place groups:

- the driver and all passengers must wear a mask, or meet local and state laws and guidelines;

- the vehicle must be well ventilated as far as is possible; and
- passengers should disinfect their hands using an alcohol based hand sanitizer before touching their face, eating, and after completing their journey.

C. Accommodation

Accommodation selected by (1) WSL for WSL personnel (and athletes and their team personnel if applicable) and (2) athletes and their team personnel, must comply with the following general principles and be recognised to be meeting current local COVID-19 related safety standards.

General Principles

For shared houses, the following is required:

- Only (1) shelter-in-place groups or (2) groups that have received negative COVID-19 tests (within 72 hours of taking occupation of the residence) should be accommodated in shared houses;
- all occupants in a shared accommodation must sign the WSL COVID-19 Waiver;
- the group must be prioritised by recent house share or transport history if possible;
- only one person per bedroom can be accommodated;
- the occupant of each bedroom should have their own allocated bathroom, if possible, or occupants should ventilate and disinfect all shared bathroom and shared toilet areas before and after each use;
- doors to all bedrooms, bathrooms and toilets must remain closed;
- the entire house should be kept well ventilated;
- occupants should remain physically distanced at all times (6 feet);
- occupants should not enter or use bedrooms or bathrooms not assigned to them;
- occupants should limit time spent in communal areas;
- occupants should wear masks at all times in communal areas, except when eating and drinking;
- occupants should eat and drink outdoors if there is a terrace or similar outdoor space, to avoid removing their mask indoors;
- occupants should not share communal bowls and platters, or food touched during preparation;
- occupants should disinfect or thoroughly wash any shared items between uses (eg, kitchenware, hairdryer);
- occupants should disinfect all high-touch items regularly;
- occupants should wash their hands immediately after touching anything that someone else may have touched (eg, door handles, light switches);
- occupants should wash their hands regularly and before eating and drinking or touching their face;
- occupants should practice good respiratory hygiene, even while wearing a mask.

- occupants should sanitize their phone regularly.
- all occupants must *report illness* to Bern Page (bpage@worldsurfleague.com) immediately, if they experience any COVID-19 like symptoms of illness.

D. Event Site - Physical Distancing

- A perimeter will secure the event site.
- **Only athletes, athletes' team members and essential event personnel who have been subject to the event's advanced screening procedures, will be allowed to enter the event site.**
- The perimeter will be monitored 24/7 (or alarmed) from 17h00 on the day prior to the start of the event window.
- Entry points to the event site will be manned 24/7 from 17h00 on the day prior to the start of the event window.
- All WSL personnel are required to comply with all physical distancing guidelines in effect at all times at WSL Events. Only limited exceptions will be made where required for critical operations – such as in the case of water taxiing of athletes during heats, in the case of an emergency, or during medical treatment.
- Physical distancing guidelines will be implemented throughout the event site, as further detailed in the Event Operations section, including but not limited to:
 - The movement of personnel will be purposefully designed through an accreditation process to limit personnel to essential areas of work only, and keep athletes separate from all other event attendees, to address physical distancing protocols.
- Spaces will be arranged within the event site to further WSL's physical distancing plans.
- The event site has been designed to minimize enclosed areas and maximise well ventilated areas.
- A capacity for each enclosed area (such as the broadcast truck) will be determined, to operate the physical distancing plans. The determined capacity will be clearly marked at the entry to each enclosed area.
- WSL appointed security teams and staff will be present to enforce the physical distancing guidelines.
- Longer set up times for the event site will be planned to further accommodate physical distancing measures.
- Regular beach commentary announcements will be made to encourage any public who are present on the beach to adhere to all local and state physical distancing guidelines and to wear masks at all times in public places if required by the state at the time of the event.
- All other applicable state and city physical distancing guidelines will be enforced at all times on the event site.

E. Advanced Screening

All WSL personnel, athletes and athlete team members involved with WSL events will be subject to the following screening procedures and guidelines. The screening procedures and guidelines will be implemented by WSL event management, WSL appointed security teams and WSL appointed

medical teams. This screening process also applies to media or any other 3rd party, if onsite for an event.

1. Screening & Accreditation

(i) Athletes, (ii) athlete team member / plus 1's, (iii) essential staff, authorised to attend or work within the official areas of the event site, must attend screening and accreditation as follows:

Athletes, athletes' plus 1's, staff - 1/27-1/28, 08h00-16h00

Vaccinated and Unvaccinated

- Provide proof of a negative PCR test result within 72 hours from check-in, **OR**
- Provide proof of a negative Antigen test result within 48 hours from check-in, **OR**
- Return a negative result from an Antigen rapid test provided onsite, **OR**
- Provide a “proof of recovery document”
 - A positive test result no less than 5 days prior, and within the last 90 days (if you are asymptomatic or your symptoms are resolving - without fever for 24 hours), **OR**
 - A medical note certifying the recovery of COVID no less than 5 days after a positive result or symptom onset and within the last 90 days.
 - **Any athlete providing a proof of recovery document with a positive test result dated less than 10 days prior to check-in, will need to return a negative antigen rapid test onsite.**

VIP / Guests - 1/28, 08h00-16h00; event days from 06h00

Vaccinated and Unvaccinated

- Provide proof of a negative PCR test result within 72 hours from check-in, **OR**
- Provide proof of a negative Antigen test result within 48 hours from check-in, **OR**
- Provide a “proof of recovery document”
 - A positive test result no less than 5 days prior, and within the last 90 days (if you are asymptomatic or your symptoms are resolving - without fever for 24 hours), **OR**
 - A medical note certifying the recovery of COVID no less than 5 days after a positive result or symptom onset and within the last 90 days.
- **Onsite Covid tests are not offered for VIP's or Media, who must arrive with their own test result or proof of recovery from Covid documentation.**

Testing Protocol

Symptomatic

COVID testing will be provided for event personnel who become symptomatic.

Diagnosed (At onsite screening)

If you have a positive test result, you would need to isolate immediately and we would arrange for a PCR test for you.

- If the result is positive, you must isolate for 5 days and if after 5 days you are asymptomatic or your symptoms are resolving (without fever for 24 hours), you may exit isolation and work / compete, so long as you wear a mask when around others for the next 5 days.
 - **Athletes will need to return a negative Rapid test result onsite on the morning of their Day 6 and before returning to competition. If this test returns positive, the athlete would need to remain in isolation until returning a negative Rapid test result.**
 - For athletes who are competing during the 5-day mask period, (days 6-10), you must wear a mask when you pick up your jersey from the beach marshall. After you pick up your jersey, you may remove the mask to compete. Once you return to the beach, you must put on a mask, prior to any post-heat interview. Or entering the event site.
- If the confirmation PCR test result is negative, we would arrange another PCR test 24 hours later.
 - If the 2nd test is also negative, you can end isolation
 - If the 2nd test is positive, you would need to complete the isolation listed above, with the 5 days starting from the date of the first positive test result.

Close contacts

Diagnosed persons will be asked to supply a list of “close contacts” (i.e., someone who was within 6 feet of an infected person for a cumulative of 15 minutes or more over a 24-hour period starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated)

If you are identified as a close contact, you will need to:

- wear a mask around others for 10 days
- If you develop symptoms you will need to isolate immediately, and a PCR test will be arranged for you.

- If the result is negative, you can end isolation but continue to wear a mask around others until symptoms have resolved.
- If the result is positive, you will need to complete the isolation listed on the previous slide (Diagnosed).

2. WSL COVID-19 Waiver

All WSL personnel, athletes and athlete team personnel are required to sign a WSL COVID-19 Waiver document prior to being allowed to enter an event site. The WSL *COVID-19 Waiver* confirms the following:

- the person will not enter a WSL worksite or WSL event site until returning a negative COVID-19 test result, if having experienced any of the listed official COVID-19 symptoms (WHO, CDC: runny nose, sore throat, headache, chills or repeated shaking with chills, pneumonia, muscle pain, cough, fever +100.4F / 38C, anosmia, shortage of breath) or having knowingly been exposed to COVID-19;
- the person, if previously diagnosed with COVID-19, will not attend a WSL worksite or WSL event site, until having met the local criteria to end isolation, or: (i) 10 days after symptom onset, or 10 days from the positive test result if asymptomatic; and (ii) resolution of fever for at least 24 hours, without the use of fever-reducing medications, and with improvement of other symptoms;
- the person will adhere to a temperature check if required when entering a WSL worksite or WSL event site, or when feeling unwell when at a WSL worksite or WSL event site;
- the person will inform WSL management and follow all WSL procedures relating to symptoms, exposure, diagnosis and contact tracing, if feeling unwell;
- the person will inform WSL management immediately if they develop any of the listed official COVID-19 symptoms within 2 days of attending a WSL worksite or WSL event site;
- the person understands the risks of contracting COVID-19 and the consequences of transmitting COVID-19; and
- the person agrees to follow all COVID-19 procedures and self care guidelines at a WSL worksite or WSL event site.

3. Hand Sanitization

Is required at the entry to the event site, with sanitizer provided.

4. Masks

Masks are required to be worn at all times onsite except:

- When eating or drinking;
- Athletes warming up for a heat, in transit to or from a heat and while surfing;
- Broadcast interviewers or interviewees during interviews;

- Broadcast commentators and anyone being interviewed on the set;
- People on stage at the awards ceremony.

Additionally, athletes with COVID who have ended isolation after 5 days if they are asymptomatic or their symptoms are resolving (without fever for 24 hours), must during days 6-10 of having Covid continue to wear their mask until they have collected their competition jersey and left the event site to go to the water for their heat. On exiting the water from a heat, such athletes must wear a mask again before entering the event site or joining a post heat interview.

Mask Guidelines:

- Valve masks, fleece masks and bandannas are not accepted.
- Surgical or fabric masks should be used.
- Masks should not be placed on:
 - anyone who has trouble breathing,
 - young children under age 2 (adjust as may be needed per state / country)
 - anyone who is unconscious or anyone who is incapacitated or unable to remove the mask without assistance.

5. Official Photo ID

Is required to collect your event credential at the accreditation booth.

F. Protective Guidelines & Self Reporting

Protective Guidelines

WSL personnel, athletes and athlete team members should review the [World Health Organization \(WHO\)](#) and [United States Centers for Disease Control and Prevention \(CDC\)](#) information and guidelines in advance of attending WSL events. The guidelines include the following:

- COVID-19 symptoms.
- COVID-19 Transmission
- Self Care, protection and hygiene
- Respiratory etiquette
- Physical distancing
- Cleaning & disinfection
- Keeping updated with COVID-19 hotspots
- What to do if you develop symptoms.

Signage referencing the most recent CDC / WHO guidelines must be posted in strategic locations throughout the event site in both restricted and public attendance areas if applicable.

Self-Reporting Procedures

WSL and event personnel, athletes and athlete team members are required to comply with the following self-reporting procedures if (1) exhibiting symptoms of COVID-19, (2) having been in contact with anyone exhibiting symptoms of COVID-19, or (3) having been in contact with anyone diagnosed with COVID-19:

- Immediately report symptoms to a licensed physician and adhere to all advice provided by such licensed physician, including testing, physician visits or self-quarantine;
- Notify Bern Page (bpage@worldsurfleague.com).

WSL will have the full discretion to prohibit your attendance at a WSL event or require you to leave the location of the event immediately if WSL determines that you pose a risk to yourself or others.

G. Cleaning

WSL will coordinate closely with the event site management to consult on a cleaning and sanitization procedure.

- For disinfection, *EPA-registered household disinfectants for use against SARS-CoV-2 (COVID-19)* or equivalent locally regulated household disinfectants for use against SARS-CoV-2 (COVID-19) must be used.
- The event site must be cleaned and sanitized prior to commencing the WSL Event, and regularly throughout the event.
- All surfaces requiring sanitization must be sanitized with disinfectants against viruses.
- Floors must be cleaned thoroughly like all other surfaces, to include the floors in offices, bathrooms and with special attention to indoor floor spaces.
- Disinfection disposable wipes must be provided and strategically placed throughout the event site so that high touch surfaces such as door handles and work surfaces can be sanitized regularly or between each use.
- Scheduled regular cleaning of high touch surfaces such as door and fridge handles, light switches and work surfaces must be carried out.
- Adequate time must be allowed for proper disinfection, whilst following cleaning product instructions.
- Cleaning personnel must wear face masks, and if recommended by the disinfectant manufacturer, gloves should also be worn.
- Hand sanitizer stations must be placed in various locations throughout the event site.
- Frequency of routine cleaning procedures must be increased as compared to standard operating procedures.
- Personal equipment such as site radios must not be shared between users, unless disinfected between each user's use.
- Other equipment easily contaminated by a user, such as athlete warm up area equipment, beach commentary or broadcast microphones must be disinfected thoroughly between each user's use.
- Competition jerseys if rotated must be disinfected between each user's use, allowing adequate time to complete the disinfection cycle. Disinfected jerseys must be adequately

COVID Safety Plan, 2022 CT1, Billabong Pro Pipeline

rinsed in water to ensure no chemicals remain on the vest, before re-issuing the vest to the next athlete.

- The [CDC guidelines for cleaning and disinfecting](#) must be followed at all times.

H. Medical

WSL will continue to implement its medical procedures, with appropriate modifications to address physical distancing measures while maintaining an appropriate level of care for athletes and personnel that participate in or work at WSL events.

These modifications will include limiting access to the medical treatment room and ensuring that the medical room is well ventilated at all times. Further details on the operational procedures of the WSL medical staff are provided in the Event Operations section below.

The event Doctor has confirmed the following hospital/s will be used to refer patients to for further treatment, if necessary:

1. Pali Momi Medical Center (Level 3 Trauma Center), 98-1079 Moanalua Road, Aiea, HI 96701
2. The Queen's Medical Center (Level 1 Trauma Center), 1301 Punchbowl St., Honolulu, HI 96
3. The Queen's Medical Center - West Oahu, 91-2141 Fort Weaver Rd., Ewa Beach, HI 96706

The WSL medical team will adhere to COVID-19 special protective measures during all contact while treating patients.

I. Food & Beverage

Personnel lunch breaks will be staggered and dining furniture layout (if applicable) will be configured to further promote physical distancing.

J. Site Layout & Ventilation

Site areas such as the athlete deck, athlete lockers, judges tower, etc., will be structured to facilitate the natural ventilation, with no doors at entry points, removing the possibility of high touch door handles.

Where doors are essential, regular cleaning of high touch door handles will be carried out.

Hand sanitizer will be provided at the entry to the event site and restricted spaces such as the broadcast truck, judges area, host set and lockers.

K. Event COVID Safety Manager

Robin Erb and **Bern Page** have been appointed to act as the event COVID Safety Managers, will be present at the event, and will be responsible for monitoring the COVID health and safety procedures and event operations detailed in this Plan, throughout the event.

EVENT OPERATIONS

This section of this Plan outlines the operational details and procedures that will be in place for the event.

A. Event Personnel & Access

The *maximum* number of WSL personnel required to produce the event will be 150.

The maximum number of athletes required to produce the event will be 54

The maximum number of athlete team members to produce the event will be 54

Each athlete can appoint a “Plus 1” , who could be a coach, guest, or photographer. **The “Athlete Team Member Content Capture Agreement” must be signed.**

All WSL personnel, athletes and athlete team members will receive an event credential for entry to their area/s of work and competition only, to keep athletes separate from other event attendees and address physical distancing protocols. The event credential will be issued once:

- The person has signed a WSL COVID-19 Waiver,
- The person has provided a negative COVID test result (PCR -72hrs / Antigen -48hrs), or Covid recovery documentation (See E - Advanced Screening, above) , and
- The person produces an official photo ID at the accreditation booth.

All WSL personnel, athletes and athlete team members are required to wear their credential at all times while onsite, to be granted access to restricted areas for which they are authorised to access.

ATHLETES and their team members, will have priority access to the athlete lockers up to 2 hours before and up to 2 hours after their heats, to maintain physical distancing in these restricted areas.

Athletes and their team members will have priority access to the athlete deck and warm up area before and after their heats, to facilitate physical distancing and maintain the area capacity.

B. Other Enhancements to Standard WSL Operating Protocols

Below is a list of other significant enhancements that WSL event management will implement in connection with WSL events to further the objective of this Plan and to create a safer working environment:

INTERVIEWS

Interviews will be conducted while maintaining safe physical distancing.

HAND WASH STATIONS

COVID Safety Plan, 2022 CT1, Billabong Pro Pipeline

Will be provided around the event site: (1) in restricted areas of the event site; (2) in public attendance areas if applicable; (3) near food vendors if applicable; and (4) near toilets.

MEDICAL PROCEDURES

- Onsite medical treatments will be conducted for injured persons only.
- The medical treatment room will be well ventilated.
- The medical treatment room door will be open as far as is practicable to avoid presenting a high touch handle.

ANTI-DOPING PROGRAM (if applicable)

- The standard operations of the WSL Anti-Doping program, will be modified to comply with the health and safety protocols implemented by this Plan.
- There will be a designated space within the event site for its critical operations.
- Drug collection officers are required to complete their critical functions in compliance with physical distancing rules throughout the entire sample collection process, and are required to be utilizing the appropriate personal protective equipment at all times.

C. Isolation & Contact Tracing

A detailed procedure is in place for WSL event management to follow in the event of anyone presenting COVID-19-like symptoms, becoming a “close contact”, or being diagnosed with COVID-19.

D. Insurance

WSL event management will maintain in full force and effect the following insurance policies, and must provide proof of such insurance policies upon request: Commercial General Liability Insurance, Workers Compensation Insurance, Automobile Liability Insurance, Excess Umbrella Insurance, and Property Insurance.

COVID Safety Plan, 2022 CT1, Billabong Pro Pipeline
